

# LIQUID CRYSTAL DISPLAY, PANEL THEREFOR, AND MANUFACTURING METHOD THEREOF

## ABSTRACT OF THE DISCLOSURE

5           A panel assembly for a liquid crystal display is provided. The panel assembly includes a panel and a plurality of spacers formed on the panel for supporting the panel. The spacers have at least two different heights or at least two different contact areas with the panel. The spacers include a plurality of first spacers and a plurality of second spacers having a height lower than the first spacers and having a contact area wider  
10           than the first spacers. The height difference between the first spacers and the second spacers is preferably in a range of about 0.3-0.6 microns, and the second spacers have a length larger than the first spacers preferably by 10-20 microns.
